

Helping Employ Military Personnel **H.E.M.P INITIATIVE**

We will support you by allowing us
to continue to support our nation.

EDWARD HINES JR
VA HOSPITAL

THE HEMP INITIATIVE

OPPORTUNITY TO HELP We have an economic opportunity to change the lives of our military soldiers and veterans which will expand into them helping with our retired First Responders and the homeless. This will be achieved through the HEMP Initiative (Helping Employ Military Personnel) which will help integrate veterans back into society and the civilian work environment that compliments their skills and training obtained in the military.

THE COMMITMENT The HEMP Initiative is a double play on words as the hemp fiber plant can be used to make 35,000+ different products. Companies and corporations will make a commitment to transition their hiring and training to Help Employ Military Personal. They will also make a simple commitment to look to transition their running and manufacturing expenses to hemp based products produced and grown in the United States, by companies that are also part of the HEMP initiative. These actions will give the corporations significant tax breaks for hiring veterans, but also environmental tax breaks. The HEMP initiative shows the public that the corporation cares about veterans, the environment, and the U.S. economy. The ability to control our U.S. supply lines and bring manufacturing back to the U.S. becomes more important everyday given the current situation in China with the Coronavirus. The HEMP Initiative will be the driving force to help our veterans, First Responders, and the homeless become an integral part of our economic growth and environmental change. Our veterans and citizens alike need a hand up not a handout. The HEMP Initiative will bring farming, manufacturing, production, innovation, and more importantly hope for a better, safer future.

OUR SOLUTION To gain traction in the market, we will identify new and existing companies that are looking to support our country and our military. We will team them up with the VA organizations in their area where hiring days can be operated. This brings new veterans to the VA while providing vital employment opportunity to the veterans.

We have also negotiated contracts with Viral Suppression Systems (VSS) for reduced licensing fees for any veteran owned operation to become a licensee. VSS would also like to offer the opportunity to the VA and American Legion to own these licenses and help put military veterans back to work. This also provides a profitable revenue stream for the VA and American Legion entities to expand and supply any required services without having to ask for more grants from the government. We are currently negotiating with other companies from farming to manufacturing operations. As we bring more companies we would want to work with the VA to develop a staffing website/ app that makes it easy for companies to hire veterans, while also helping the companies understand all the tax advantages they get from hiring some of America's finest.

VIRAL SUPPRESSION SYSTEMS (WHAT WE OFFER)

Viral Suppression Systems is offering industry leading disinfection spray/fogging systems, organic cleaners and disinfectants, custom operations plans, security systems, and other products that will provide safe environments free from bacteria, viruses, mold, mildew, and other pathogens in the air and on surfaces. We are in development of *safety operating plans* for residential, commercial, medical, industrial, and school facilities to open safely. While the plan for a senior care center will be very different from a plan for a grocery store, we have written a safety guideline base document that is updated and modified to meet the specific business's needs. VSS provides safety operations manuals, transportation manuals, security operations manuals, and protocols in a complete plan set format that detail an operation from the security and disinfection standpoint from start to finish.

TOOLS | SERVICES | PROGRAMS

1. Bio-Blasting certified organic HD Cleaner with 20 USG registered kill claims including COVID
2. Paerosol Fogging/Misting System - DOEPatented - Hypochlorous based - 100%Safe
3. Proguardem Hypochlorous Acid liquid spray disinfectant
4. The Shield Disinfectant and Protectant (Up to 8 Hours)
5. Pro-Guard Air Ionization System (part of a 24/7 solution for disinfection)
6. ULV Sprayer/Foggers for the best coverage and efficient usage
7. Security operations consultants, and system designers withover 75 years experience
8. Customized safe operating plans based on business type
9. Mobile operations and service capabilities
10. Qualified and trained spray and service technicians
11. Providing PPE packs, sanitizer stations and individual products for sale and distribution
12. Can design and implement multi-facility integrated operations plans with central security and monitoring for any size operation.

HEMP PRODUCTS & SERVICES

1. Comprehensive hemp grow operations producing hemp for fiber, food, and CBD.
2. Full training in many disciplines in the hemp Industry including growing, harvesting, processing, and formulation.
3. Development of specialized hemp products to meet the current needs of the veteran community including special products to help with PTSD and other medical issues.
4. Developing Veterans Village, which will support hemp grow operations and processing of the different types of hemp.
5. Creation of a hemp drying system that will save 1 000's of acres of hemp from Botrytis "Budrot" during wet growing seasons.
6. Complete training in Hemp/THC remediation processes and protocols.
7. Development of standardized procedures in support of Hemp Initiative operations and a host of partners.

COMMUNITY, CITY & STATE ROLLOUTS

The Viral Suppression Systems business Standard Operating Procedure (SOP) for cleaning, disinfection, protection, and security, are customized to meet individual facility needs. These SOP's are living documents and updated accordingly in order to meet the needs of a changing world. The platform will roll out in three states to start (California, Florida, and Oklahoma) where we have feet on the ground. Below is a list of five potential business or organization types that we can service and what we can provide for each in order to get them up and running safely.

CHURCHES AND MEETING HALLS The issue of getting these facilities open and functioning in a safe manner has been a real topic of concern. VSS has developed a base operating plan that can be easily updated to meet the needs of a specific facility.

HOSPITALS & MEDICAL FACILITIES Since these facilities are operating at high levels now the SOPM is a secondary part of what services we offer here. We have a list of products that have been researched and developed to meet the needs of a Hospital/ Medical environment and would also include increased security integration at many places in order to maintain the level of visibility and traceability required during a pandemic and afterwards.

TRANSPORTATION (METRO, BUS, TAXI, AVIATION) This is a highly controversial area and requires a detailed operating manual for each individual service in order to maintain a safe environment for travelers or passengers. The use of The ProGuard Air Ionization System would be of great use in this environment and would provide a great tool as the base for disinfection. We have found that combinations of products and services are required to provide a safe platform for operation in most any application.

SCHOOLS (SPECIAL EDUCATION, NURSERY, PRIMARY & SECONDARY, COLLEGE, UNIVERSITY) The need for a real standardized plan for schools of all types to reopen is the most important SOP that we could write. It is also the most difficult because it deals with our children. We know we have the products to support the needs, but also know that standardization of a plan is key to the success of the overall program. We are focused on this aspect and expect our base operations plan for schools to be completed this month.

ENTERTAINMENT FACILITIES (STADIUMS, ARENAS, RESORTS, HOTELS, CRUISE SHIPS) We believe that this aspect is very important to the overall state of mind and wellness of our nation. While "vacationing in place" is a nice idea, the thought of not being able to go to a football game or on a cruise needs to be addressed. We are developing plans for these industries and they will include many products and services. We also realize that aesthetics of a facility are important and will always do our best to make our impact to normal operations as minimal as possible.

CORPORATE/SMALL BUSINESS ADVANTAGES

1. Will provide employment opportunities and veteran programs for recovery and rehabilitation
2. Brand exposure for our business partners
3. White label opportunities for hemp products manufactured by veterans and First Responders
4. VSS franchise opportunities for veterans and First Responders
5. Access to HEMP Initiative network and database of members and or partners across the nation
6. Will provide a list of qualified veterans to businesses advertising for employment

DETAILS OF THE PLATFORM

- Fire Division Chief's/ Battalion Chief's within every region to consider implementation of standards and SOP's set forward by the VSS and HEMP Initiative teams.
- American Legion partnership with Hemp Initiative is to service and support Project Vet Relief to help our servicemen and women transition into civilian life.
- % TBN (To Be Negotiated) of all awarded contracts will be allocated to the responsible first responder network officials to disperse throughout the departments as needed.
- % TBN (To Be Negotiated) of all awarded contracts will be donated to community non-profits to disperse throughout the needed areas of assistance.
- % TBN (To Be Negotiated) of all awarded contracts will be allocated to community church officials to disperse as needed for community assistance efforts.

OPTI-CLEAN CUBE

DESIGNED & MANUFACTURED BY

Proguardeum Inc. in partnership with Xtreme Cubes Corp., announces an important break-through in moving forward from the impact of the global pandemic. The **Xtreme Opti-Clean Cube (XOCC)**, is a custom-engineered relocatable (or permanent), modular walk-thru structure designed to combat the spread of COVID-19 while entering and exiting building environments.

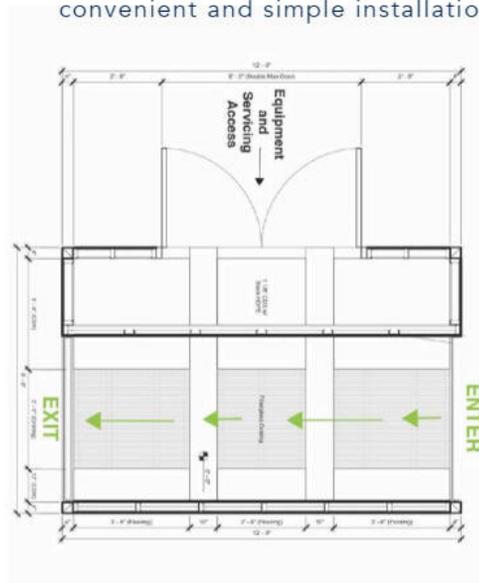

XOCC is designed to safely deliver a complete 360° coverage of ultra-light volume (ULV) "dry mist" application of **Optimum™ Pro Surface Defense**, an EPA-FDA approved stable pH neutral formulation of hypochlorous solution (HOCL). HOCL is made naturally in white blood cells to fight against infection, reduce inflammation, and enhance the healing process. Through our proprietary technologies Optimum™ Pro Surface Defense is produced at its highest purity without any contaminants, offering superior efficacy to inactivate known pathogens and long-standing stability for storage. The natural formulation contains no additives, buffers, or preservatives, and is non-toxic, non-hazardous to people and surfaces.

- Safe for all areas of skin, clothing, and accessories
- 100% natural, Eco-friendly, Non-toxic, Non-hazardous; 99.8% purified super optimized water
- Simply walk through, no stopping necessary
- Designed with weatherproof steel modular relocatable or permanent structure
- Customization available for motion sensors for intermittent traffic and/or thermal sensors
- Customization for brand advertising available
- SARS-CoV-2 Validated Environmental Testing available

OVERVIEW

The Opti-Clean Cube innovative design is engineered to your specific location conditions to withstand snow load, wind load and seismic events. Upon delivery, the Opti-Clean Cube can be set in position, connected to site utilities and be ready to use immediately. All utility connections are preconfigured for a convenient and simple installation.

DESIGNED & MANUFACTURED BY

POWERED BY

FEATURES

- 8' x 12' x 8' frame with built-in fork pockets and raised spill containment floor
- Imron polyurethane paint white exterior
- Exterior single-phase load center and breakers
- Steel floor grating walkway
- 18GA steel wall sheeting
- Welded structural steel tube frame enhances the overall strength and options for customization
- Modular wall panels can be easily customized with doors, windows, and other options
- Premium components are utilized inside and out for durability and long life.

OPTIONS

- Can be equipped with motion sensors that provide for intermittent traffic
- Customizable with thermal camera temperature systems
- Insulation compliant with jurisdiction
- Rated electrical available
- Customers and employees simply walk through the modular XOCC, no stopping necessary
- Steel modular relocatable or permanent structure
- Extended warranty available on some components

CONTACTLESS HAND SANITIZING STATION

SMART SANITIZING SOLUTION

Features:

- Highly durable steel construction
- Designed for Indoor & Outdoor Use:
- Office & Commercial
- Retail & Grocery
- Schools & Cities
- Ships Fully Assembled
- Simple & Secure Bottle replacement process
- Fasten using pre drilled holes in base
- Designed & Manufactured in North America
- 2 Year Warranty

Part Number	Description	Price
VSS-MDM-PG-60	The MDM-PG-60 is a manual compression sprayer using ULV technology. Spec is available upon request	\$299.00
VSS-ULV-PG-426	The PRO426 ULV Dry Mist Sprayer rugged construction is German engineered with a powered supply in either 240/120 Volt AC. The reliable, powerful electric high speed (38,000 rpm) AC induction motor and fan is designed to create very small spray droplets into a consistent 15 micron droplet size range utilizing the principles of a vertical air shear nozzle technology	\$449.00
VSS-ULV-PG-383	The PRO383 ULV Dry Mist Sprayer is a high-efficiency portable cordless sprayer ideal for application both indoors and outdoors. With its unique mechanical design and electronics technology, the PRO383 is able to deliver a consistent fine aerosol throughout the whole application.	\$1200.00
VSS-ULV-PRO-MOBILE	The PRO-MOBILE ULV Dry Mist System is designed to mitigate surface and airborne pathogens by providing an ergonomic means of applying sanitizers and disinfectants faster, safer and quieter in large settings. The ULV application provides higher efficacy by ensuring a complete coverage more efficiently than traditional spray wipe methods.	\$10,000
VSS-C100-CLDSPY	The Vectorfog Cold fogging system is a true blessing for our Tech's. It can be used with most any fluid and has a droplet size of 5-20 microns which is perfect for our spray liquids.	\$750.00
SERVICES		
VSS-SPRAY-SERV	Certified professional spray cleaning, disinfection, and protection of a vehicle, home, business or any facility with both indoor and outdoor services available. Pricing is based on facility size, type, or area to be serviced and what other measures may be necessary to disinfect and secure the space.	Starting as low as \$0.10 Per Square Ft.
VSS-SOP-MANUAL	Development of customized Safety Operating Plans (SOP) and protocols that will provide detailed step by step programs for any facility, home of business.. Serviced is priced by the hour.	Call For Price

Wholesale and quantity pricing can be furnished upon request. We have more products coming on board in the coming weeks and will update the list with any new products at that time.

Call 760-289-5430 or e-mail us at sales@viralsuppressionsystems.com for more information

SUMMARY

The HEMP Initiative brings opportunities, medicine, healing, knowledge, and training to support current and future veterans and retired First Responder needs. Additionally, we have developed programs to reinvigorate the work force, alleviate homelessness among veterans. We support the production of American-made sustainable goods and services for veteran employment. Through the HEMP Initiative we have capitalized upon our relationships with veteran organizations. Our focus for potential contracts include:

1. Contracts for cleaning, disinfection and protection of VA and American Legion buildings and facilities throughout the U.S.
2. Consultation contracts to help veterans set up businesses like VSS so they can help hire vets, creating employment while generating profit to help finance other programs. Helping to turn the infrastructure that is already in place into revenue producing programs like staffing agencies.
3. Hemp Consulting with VA and American Legion entities to work with military and government agencies, showing them how they can transition their yearly expenses on paper goods, concrete, and many other products to be manufactured as a hemp commodity and grown and manufactured by our veterans. This truly puts our veterans and first responders at the forefront of our push to regain control of our economic, environmental, and production capacities here in the U.S.

NOTE: The fee for a user license from VSS is \$25,000 which is reduced to \$10,000 for veterans and First Responders. For an investment of \$15,000.00 (which is \$10K for a van and \$5k for the equipment) gives a profit margin of over \$70,000 in the first turn of product from sales in the branded and wrapped van.

A man in a white honor guard uniform is holding a large American flag. He is wearing a dark blue cap with the number 171 on it. The uniform has a patch that says "HONOR GUARD" and another that says "LEGION #171 HONOR GUARD". The background is a blurred cemetery with white headstones.

THANK YOU

HEMP
INITIATIVE
